

FOR IMMEDIATE RELEASE

Mozambique Prepares for 10th Gas & Energy Summit Amid Expanding Infrastructure and Energy Ambitions

Summit to Drive Dialogue on Gas, LNG and Regional Infrastructure; New Youth and Logistics Initiatives Announced

Maputo, Mozambique – Global and African energy sector stakeholders are set to converge in Mozambique at the Joaquim Chissano International Convention Centre from 22–24 September 2025 for the 10th Mozambique Gas & Energy Summit & Exhibition. The Summit, organised by dmg events in partnership with ENH (Empresa Nacional de Hidrocarbonetos), aims to solidify the nation's position as a regional energy hub, attract international capital, and showcase new initiatives in infrastructure and workforce development.

Gas, LNG and Energy Transition in Focus

More than 3,500 attendees—including senior executives, financiers, and policymakers—will participate in discussions on gas, LNG, and Mozambique's energy transition. Key sessions will address offtake agreements, project tenders, multilateral partnerships, and the role of technology in advancing decarbonisation and socioeconomic growth. The organisers anticipate over 1,000 high-level delegates and 275 exhibiting companies, with attendance spanning 35+ countries.

Decade-Long Transformation and New Partnerships

For a decade, the Summit has catalysed megaprojects and fostered public-private cooperation, driving jobs, skills, and knowledge transfer in Mozambique's energy sector. The 2025 edition marks a new partnership between dmg events and Field Ready, integrating the proprietary youth employability platform into the Summit's opening day. The Generation Ready Programme, now in its fourth year, will connect pre- and post-education candidates with employers, industry leaders, and policymakers in a bid to cultivate the next generation of energy talent.

Infrastructure Investment and Regional Integration

Coinciding with the Summit is the inaugural Africa Ports, Logistics & Infrastructure Summit, launched in partnership with the Mozambique Ministry of Transport and Logistics. Set for 23 September 2025, this event aims to attract over 300 delegates from 25 countries to address the region's industrialisation, connectivity, and gateway potential. Mozambique's infrastructure pipeline includes the USD 6.5 billion Ponta Techobanine Port and the USD 785 million Maputo-Katembe Bridge, as well as strategic corridor developments linking Dar es Salaam, Nacala, Durban, Walvis Bay, and the Lobito Corridor.

Strategic Outlook

Mozambique's expanding energy, ports, and logistics sectors are positioning the country as a critical gateway for pan-African and global supply chains. The Summit will spotlight Mozambique's role as a major player in meeting future continental energy demand and fostering regional economic integration. Government and industry leaders, notably from ENH, MIREME, INP and others, are expected to leverage the Summit for new partnerships, technology transfers, and investment frameworks.

Looking Ahead

As the only dedicated platform in Mozambique for the global and pan-African intersection of gas, energy, ports, logistics, and youth workforce development, the 10th Mozambique Gas & Energy Summit & Exhibition is expected to be a catalyst for Mozambique's continued transformation and rising prominence in global energy and infrastructure markets.

With over 5 Ministers confirmed to participate, the Summit is sponsored by Aiteo, ExxonMobil, XRG, Eni Rovuma, Sasol, TotalEnergies, Mozambique LNG, Saipem, Standard Bank and Technip Energies, among others with S&P Global Commodities being the officially appointed Knowledge Partner.

The Summit runs 22–24 September 2025 in Maputo, Mozambique. Registration and further event details are available on the official Summit website.

About The Mozambique Gas & Energy Summit & Exhibition (MGES) 2025

Convening The International Gas, LNG & Energy Industry In Mozambique For Over Ten Years

The Mozambique Gas & Energy Summit & Exhibition will gather key Mozambican and international government, ministerial and industry stakeholders along with IECs, NOCs, EPCs, investors, developers and private sector value chain participants to engage in offtake negotiations, project tenders, multilateral partnerships, technology showcasing, and knowledge and best practice exchange.

Endorsed by the Mozambique Ministry of Mineral Resources and Energy (MIREME) and organised by dmg events in partnership with Empresa Nacional de Hidrocarbonetos (ENH), the Summit also promotes and empowers the development of local content to serve as a platform to evolve the Mozambican energy landscape to ensure long-term future success for the country and its citizens within the global energy community.

Participation is expected from across the global gas, LNG and energy value chain including:

- 3,750+ attendees
- 1,000+ conference delegates
- 275+ international exhibitors
- 175+ expert industry speakers
- 45+ countries represented from around the globe

About ENH (Empresa Nacional de Hidrocarbonetos)

ENH (Empresa Nacional de Hidrocarbonetos) is the Mozambican state entity responsible for research, prospecting, production and marketing of petroleum products and represents the State in petroleum operations. Created in 1981, ENH has adjusted its corporate structure to the needs of the industry and the national and international market, establishing itself as a business group with the competence to participate in all oil operations and in the respective phases of research, exploration, production,

refining, transportation, storage and marketing of hydrocarbons and their derivatives, including LNG and GTL, both within and outside the country.

Our performance as an integrated group and through the partnerships we have established in recent years, has allowed us to guarantee our core business, Upstream, with actions focused on research, development and production of Oil and Gas with the main objective of increasing the probabilities of discovery in the research phase and optimizing the recovery of resources in the production phase. At the downstream level, we continue the value chain of the hydrocarbons sector with the aim of diversifying and expanding the use of gas in Mozambique.
